Master's degree: Master in Digital Product Management, Nuclio Digital Innovation School, Spain | 2023

ACCA: Papers F1 - F9 completed

CFI FMVA: Financial Modeling & Valuation Analyst

PROFESSIONAL EXPERIENCE

Senior Business Associate | Finance & Business Operations | LSN Signs

Jan 2025 - Present | Dubai, UAE

- Prepare rolling cash-flow forecasts incorporating expected collections, overdue receivables, project advances, supplier and subcontractor commitments, operating expenditure, tax obligations and project delays, and advise the CEO on liquidity, working-capital requirements, collection priorities and funding decisions.
- Identified material costs running 26% above estimate during project delivery, traced the variance to supplier price escalation and shipping constraints and prompted tighter quotation-validity and supplier-price revalidation controls for subsequent bids.
- Review and finalise P&L, balance-sheet, trial-balance, reconciliation and management-reporting outputs, investigating unusual movements and classification errors and connecting financial results with underlying project performance.
- Partner with project managers to analyse RFP requirements, project scope, material and delivery costs, commercial risks, cash requirements and expected margins before supporting estimates, pricing and proposals.

Senior Business Services Associate | Pearl Initiative

Oct 2021 - Dec 2024 | Dubai, UAE

- Owned the preparation and compilation of monthly and annual financial statements in QuickBooks, including P&L, balance sheet, trial balance, cost allocations and supporting schedules for management review and external audit.
- Prepared cash-flow forecasts, programme budgets, grant reports, end-of-grant schedules, management commentary and variance explanations to support expenditure control, programme planning and donor reporting.
- Identified expenditure and programme delivery falling behind schedule on the Anti-Corruption and Governance in Tech programme; worked with programme managers and operations to re-sequence activities, increase weekly output and accelerate post-event reporting, enabling six months of planned activity to be delivered during the final three months of the grant period.
- Managed the complete audit process, preparing financial statements, schedules, reconciliations and supporting evidence directly for auditors; completed all three audits on time with clean outcomes and no reported findings.

Financial Analyst | Canon

Aug 2016 - Sep 2021 | Dubai, UAE

- Performed financial-statement and business-performance analysis, preparing monthly cash-flow reports, management schedules, budget-to-actual analysis and balance-sheet reconciliations and evaluating revenue, profitability, project performance and underlying trends.
- Led the migration of a five-day manual sales-performance and commission-reporting cycle requiring 30 hours of preparation into Power BI, covering around USD 2.5m in monthly sales across four commission tiers, reducing preparation time to 2.5 - 3 hours and providing near-real-time visibility for sales, finance and leadership.
- Produced month-end commission-accrual estimates generally within 10% of final cash payouts by validating eligibility against customer collections, correct posting, transaction matching and approved performance tiers.
- Investigated incorrect product-to-revenue account mappings that distorted category-level sales trends, analysed underlying transactions and coordinated corrections that restored accurate revenue reporting.

SYSTEMS & TECHNICAL SKILLS

Accounting & reporting: Financial statements | Month-end close | P&L, balance-sheet and trial-balance review | Journals and accruals | Prepayments | AP and AR | Fixed assets | IFRS | Audit management and support

Planning & analysis: Cash-flow forecasting | Budget-to-actual and variance analysis | Management reporting | Financial modelling - cashflow, project costing and revenue schedules | Project costing | Margin analysis | Working-capital analysis

Controls & compliance: Balance-sheet | Intercompany reconciliations | SOX controls | VAT and UAE corporate-tax support

Systems: Advanced Excel | Power BI | QuickBooks | Orion ERP | Palette Expense Management | SAP Finance | Salesforce
