WORK EXPERIENCE

LSN Signs **Dubai, UAE**
Senior Business Associate - Finance & Business Operations Jan 2025 - Present

- Own FP&A and commercial finance partnering with the CEO and project leadership across budgeting, 13-week cash forecasting, project costing, pricing, feasibility, margin review, RFP analysis and management reporting; identified a working-capital shortfall five weeks ahead and supported actions that avoided disruption to site work and payroll.
- Identified material costs running 26% above estimate, traced the variance to supplier price escalation and shipping constraints, and introduced 14-day quotation validity and supplier-price revalidation controls; re-priced jobs returned to the 18-22% target margin range.
- Review and finalise monthly P&L, balance sheet, trial balance, reconciliations and WIP; implemented an IFRS 15 cost-to-cost revenue-recognition schedule to better align reported results with project delivery.

Pearl Initiative **Sharjah, UAE**
Senior Business & Finance Associate Oct 2021 - Dec 24

- Owned monthly and annual financial reporting, journal-entry preparation and posting, month-end close, cash-flow forecasting, programme budgets, budget-vs-actual analysis, grant reporting and Board reporting, partnering with the Head of Finance and programme leads on expenditure control and planning.
- Managed end-to-end preparation and auditor coordination across 3 annual statutory audits and 7 programme audits, strengthening month-end reconciliations and supporting-evidence controls; all were completed on time with clean outcomes and no reported findings.
- Led the migration from QuickBooks Desktop to QuickBooks Online, transferring and validating 10+ years of accounting records while preserving balances, transaction history and reporting continuity.

Canon EMEA **Dubai, UAE**
Financial Analyst Aug 2016 - Sep 21

- Analysed approximately USD 2.5 million in monthly sales across Canon's UAE business, supporting Sales, account management and leadership with revenue, profitability, budget-to-actual analysis and management reporting in a SOX-controlled multinational environment.
- Owned journal-entry preparation and posting, month-end reconciliations and revenue cut-off controls, validating supporting evidence, customer collections, account postings and commission eligibility, and escalating unsupported exceptions before recognition or payout.
- Led the transformation of a five-day manual sales-performance and commission-reporting process into Power BI, reducing monthly preparation from approximately 30 hours to 2.5-3 hours and providing near-real-time visibility for Finance, Sales and leadership.
- Served as a key Finance representative during the Orion ERP migration and UAT, validating account mappings, migrated transactions and reporting outputs, identifying finance defects and coordinating corrections before close.

SELECTED PROJECTS

Nodes - Finance Reconciliation Workspace | Live Product | Demo

- Designed and built a controlled ERP to payment-provider to bank reconciliation workspace; deterministic rules auto-reconciled 95% of 1,000+ transactions, routed 5% for analyst review and produced zero incorrect automated matches, while AI was limited to exception explanation and Finance retained final approval.

Working Capital Agent - Cash Forecasting & Finance Automation | Demo

- Built an n8n-based working-capital workflow that monitors forecast cash against defined safety thresholds, identifies emerging liquidity pressure and triggers controlled alerts and follow-up actions while keeping Finance approval in the decision loop.

EDUCATION & CERTIFICATIONS

University of Wollongong, Australia - Bachelor of Commerce, Accounting & Finance | 2015
Nuclio Digital Innovation School, Spain - Master in Digital Product Management | 2023
CFI: FMVA Certification* | ACCA: F1-F9 passed; SBR planned Mar 2027
